

Medical Cold Plate PF47

Application

This medical cold plate PF47 is dedicated to the cooling of dynamic digital detectors in real-time X-ray imaging devices.

Main Characteristics

This very thin cold plate in a large single plate spreads temperature and maintains a homogenous temperature allowing high resolution and distortion-free image. A perfect tightness is mandatory for patient safety, avoiding leaking problems closed to electronic components.

- Power: 60 W
- Flow rate: 0.6 l/m
- Pressure drop : 2 bar
- Thickness: 4.5 mm
