50 Immersion heaters for light metals
Thermoplongeurs pour métaux non-ferreux

Supratherm 50

NEW PRODUCT LINE highly competitive kW/€/m

Available power ratings

Uses

Heating and temperature holding of light metals in:
- Melting-Holding furnaces for Gigafactories
- Holding furnaces
- Degassing units
- Transport ladles
- Continuous galvanizing lines
- Hot dip galvanizing lines.

Advantages

The Supratherm 50 immersion heater family allows you to fine-tune the temperature within your furnaces, without creating overheated zones. It also helps your factory reach energy saving and decarbonization goals.
Atherm's thermal solutions are fully customizable: the Supratherm 50 line offers a wide range of power ratings, by selecting immersion heaters of various lengths.
Our experts help you to scale the project and to choose the solution that best meets your needs.
The Supratherm 50 immersion heater comes with a 1-year guarantee*.

ENERGY SAVINGS

DECARBONIZATION

HIGH QUALITY ALLOYS

SHORT MAINTENANCE TIME

QUICK RE-HEATING

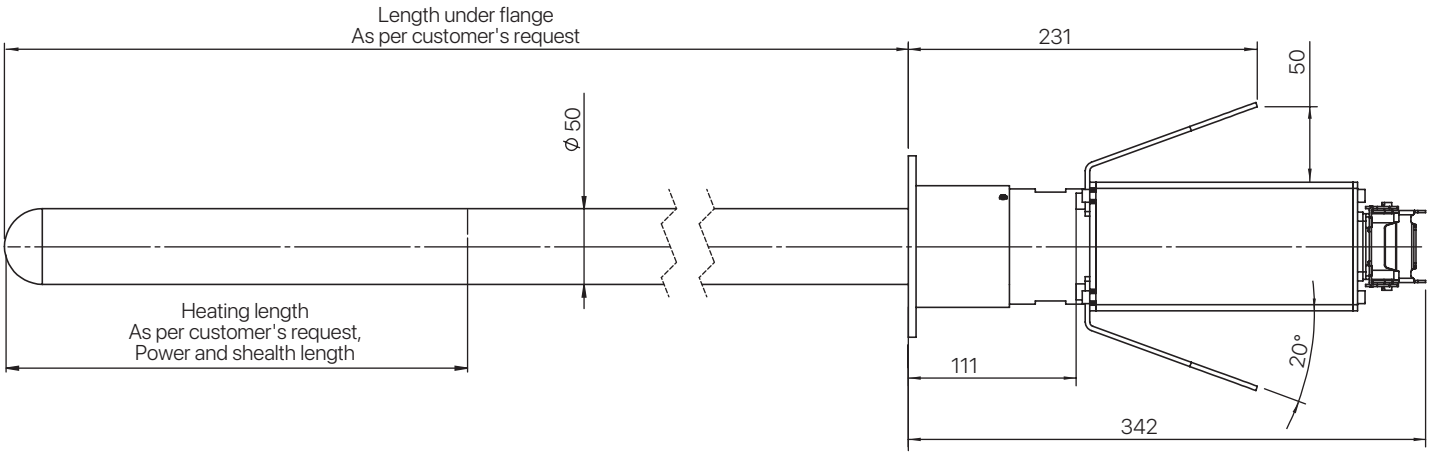

Aluminum Al 26.98 13

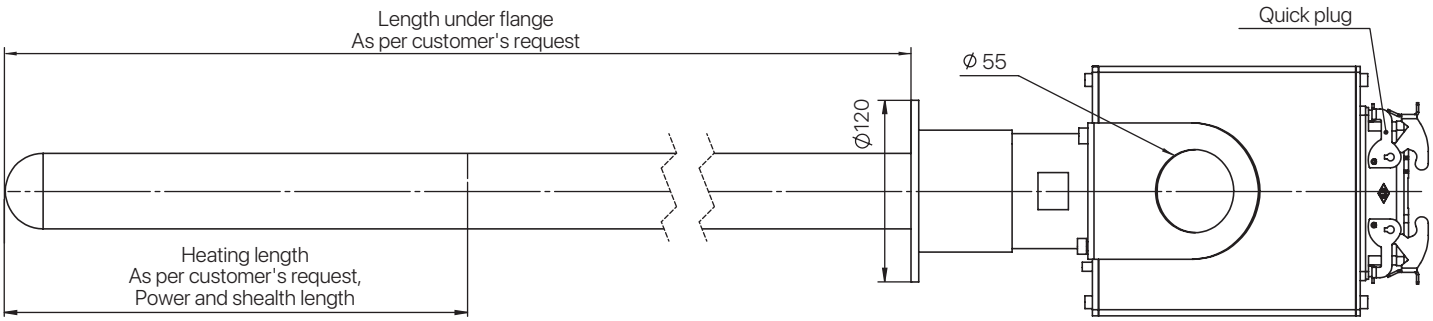

Zinc Zn 65.38 30

Al-Si, Zn-Al-Mg, and other special non-ferrous alloys

*This guarantee is issued once our technical experts have validated the project.

ATHERM

Note

Heat transfer: conductive
Resistance: Nickel Chromium
Sheath: Sialon
Power supply: adaptable, no transformer needed
